 RJSIMMONS\_SL@Hotmail.com  
 Belgrade, Serbia  
 [LinkedIn](#)  
[Career Profile](#)

**Salesforce Certified: Platform Developer 1 | Platform Administrator 1 | Platform Administrator 2 | Sales Cloud Consultant | Service Cloud Consultant | Platform App Builder | AI Associate | Agentforce Specialist**

With over **7 years** of experience in **Software Industry** and over **4 ½ years** in the **Salesforce** ecosystem, backed by **8 Salesforce certifications**, I bring a strong blend of technical expertise and problem-solving skills. I am committed to driving business growth, fostering innovation, and optimizing resources to enhance efficiency and success. I'm a graduate with a **Master of Business Administration - UK** and a **BEng (Hons) in Software Engineering - UK**, who is looking for employment in a salesforce demanding atmosphere where I can show initiative while successfully contributing towards the business

## PROFESIONAL EXPERIENCE

**Salesforce Administrator / Developer** (Full-time, permanent employment- Hybrid)

Better Collective - Denmark (From: Belgrade, Serbia)

October 2025 – Present

Salesforce administration | Process automation | Data Steward tasks | Security and best practices maintenance | Technical research | Sandbox maintenance | Users maintenance and permissions | Apex triggers + classes + batch apex and custom solutions

- Designed and implemented scalable Salesforce automations using declarative tools, Apex, and Lightning Web Components (LWC), including complex logic and validations beyond standard platform capabilities.
- Managed end-to-end Salesforce platform support & operations, handling user requests, issues, data problems, and delivering timely solutions across Sales Cloud environments.
- Led data management and reporting initiatives, performing bulk data operations (Data Loader, SOQL, Google Sheets), and building advanced dashboards and reports to drive business insights and user adoption.
- Managed release lifecycle and environments using Git-based workflows (Dev, UAT, Prod), executing deployments via git pull requests and change sets, including post-deployment steps.
- Drove **best practices**, creating documentation, training administrators on Git and workflows, collaborating, and supporting agile delivery through Linear ticketing and cycle-based development.

**Salesforce Administrator / Developer** (Full-time employment- Hybrid)

Orfium - Colombo, LK

March 2024 – February 2025

Salesforce administration | Process automation | Database migration | Security maintenance | Technical research | Sandbox maintenance | Users maintenance and permissions | Apex triggers + classes + batch apex

- Working in optimizing the Salesforce ecosystem within sales and service cloud environments.
- Adept at ensuring data quality and implementing process automations.
- Proficient in leveraging flows, formula fields, data migration, and App Builder for effective solutions.
- Providing technical consultancy and investigating tailored approaches to meet specific requirements.

## Salesforce Developer - (Full-time freelancer - Remote)

Nuvolar Works S.L.U - Barcelona, Spain. (From Colombo, LK)

May 2023 – December 2023

---

APEX | LWC | Visualforce | JavaScript | .JSON | CSS | SOQL | REST | VSCode | SOAPUI | Swagger-UI | Atlassian |  
Salesforce Configuration | Managed packages | Salesforce COE | CI | CD | CT | | Git | FORK | Bitbucket Pipelines

- I joined the project during a time when the team required an extra hand (temporary basis) to keep up with the release and handle hotfixes (upcoming production issues following the release).
- I've mostly done four types of daily assignments, such as
  - Support cases: Analyse production issues, replicate them in a full-sandbox environment, and provide a detailed report in response to the ticket.
  - Hot fixes: Bugs that require immediate attention, analyse them, apply fixes to prepare for rapid releases.
  - Releases: Features that need to work for next planned release.
  - Code quality review of pull requests.
- Implement solution using: OOP concepts (Factory model, service classes, service factory, interfaces, transport beans, DTO classes), Repository classes, Triggers, Trigger Handlers, Batchable, Schedulable interfaces, REST web services, Bulkifying codes, Test data factories, Aggregative queries, Chain jobs using Queueable apex, Sharing & security, Governor limits, maintaining consistency, and following proper comment structure.

## Salesforce Developer (Full-time employment - Hybrid)

Content Management & Solutions (Pvt) Ltd for (PWC, Belgium) - Colombo, LK

March 2021 – March 2023

---

APEX | LWC | Aura | Visualforce | JavaScript | jQuery | .JSON | CSS | SOQL | SOSL | REST | SOAP | VSCode | SOAPUI |  
Salesforce COE | CI | CD | CT | Salesforce Configuration | Process Automation | Workbench | Sales, Service, Marketing,  
Experience Cloud | Salesforce Community | Public Pages | Force.com | Git | Bitbucket | Trello | MS Teams | MS 365

- Keeping accurate planning with project life cycles and deliverable while maintaining timely.
- Routinely participate in daily standup meetings with the Belgian, Netherlands and Sri Lankan teams to discuss the planning of each project, and often carried out the weekly Monday standup presentations.
- Analysed requirement documentation and/or the software system to provide documented solutions for the business scenario requested by clients, consultants.
- Adhering to PWC guidelines for secure, timely software development
- Worked on highly customized and enterprise level Salesforce CRM projects where the system used most of the Salesforce features for the business requirements.
- Implement solution using: **Flows**, **OOP** concepts, **DTO** classes, **Triggers**, **Trigger Handlers**, **Batchable**, **Schedulable** interfaces, **REST/SOAP** web services, **Selector patterns**, **Bulkifying codes**, **Test data factories**, **Aggregative queries**, **Chain jobs** using **Queueable** apex, Sharing & security, **Governor limits**, maintaining **consistency**, and following proper comment structure.
- Resolved LWC data table CPU performance issue by using database-level calculations with zero CPU consumption (**aggregate functionality**).
- Performed R&D and created customized solutions saved the client thousands of euros per month in licensing costs.
- Create test classes with both positive and negative test scenarios with an objective of 80–90%+ code coverage.

## Software Engineer (Full-time Onsite)

Adelanka (Pvt) Ltd for (Soundmouse, UK) - Colombo, LK

April 2018 – March 2021

---

.Net | ASP.Net | .Net Core | Angular | JavaScript | .JSON | HTML | CSS | PostgreSQL | MSSQL | XML | XSLT | PgAdmin | Visual Studio | Jira | cURL.5 | Postman | Azure DevOps | FileZilla | S3Browser

- Worked on tasks such as new feature development, maintenance, defect resolution, documentation, and testing.
- Actively engaged in discussions with senior colleagues/management from the UK office.
- Collaborated closely with the test team to ensure the timely delivery of production-specific tasks on a weekly basis.
- Conducted R&D independently to propose solutions for various requirements through self-learning.
- Successfully revitalized a dormant project through independent R&D and development, utilizing .Net, Angular JS, CSS, XML, and XSLT mapping for a music metadata solution. Completed the project autonomously, including testing, performance optimization, and documentation, gaining approval for production from the test manager.

## EDUCATION

- **Master of Business administration (MBA) | May 2022**
  - University of Northampton, UK.
  - Award with a distinction grade and superior performance medal.
- **BEng (Hons) Software Engineering | July 2018**
  - London Metropolitan University, UK.
  - Award with a first-class honour and the batch top of the intake medal.
